Additional information

Summary

Evi Pini explains how the Trojan War started. The text takes the form of a fairy tale, as implied by the standard phrase “once upon a time” (my translation) at the very beginning. The book begins with Eris and ends with Iphigeneia’s last-minute rescue from being sacrificed to Artemis. Neither fighting nor bloodshed is presented. Instead, we have an account of human and divine passions and emotions, as well as a description of logistical preparations for going to war.

Children learn about a minor goddess, Eris, who throws a golden apple. The contest between Hera, Athena, and Aphrodite is difficult to resolve, even for Zeus himself. The three goddesses are shown angry and Zeus perplexed. Zeus asks Paris to choose. Paris goes for Aphrodite. The author states clearly the real incentive for going to war, namely, the Greeks’ desire to loot Troy’s treasures. The (visual) narrative of “1186 ships” gathered at Aulis is realistic. Readers may imagine a military campaign that happened in historical and not mythological time.

Agamemnon, without intending to do so, makes Artemis angry by killing her favourite deer and the goddess demands that Agamemnon sacrifices Iphigeneia, his daughter. Agamemnon shares his devastation with other kings in his tent, and this communicates messages about male solidarity and ways to cope with grief. Odysseus comes up with a lie, so that Iphigeneia and her mother think that they are going to a wedding and not a sacrifice. Achilles promises to defend Iphigeneia, but she is prepared to die. Yet, at the moment of the sacrifice, a cloud covers the altar, Iphigeneia disappears, and a deer is sacrificed instead. Divine intervention here brings hope rather than misery, and the book closes in a positive tone. We are told that Iphigeneia went far away and there is another story to tell some other time.

Analysis

This short book is exceptionally rich. Children learn the names of numerous gods, heroes, and places (see, in particular, pages 20-21 with a catalogue of kings and places). The topics covered are wide-ranging, and include war, love, jealousy, revenge, and desperation. Children form an impression of qualities that are valued in modern

times, such as teamwork, ingenuity, and solidarity, as well as stereotyped notions of gender.

The language is simple and the many colloquialisms that are popular in modern usage add vitality to how the story unfolds. Although the book is designed to be read by children independently, the story can be read also by teachers or museum education officers.

The illustrations by Elisa Vavouri appear to take cues from Bronze-Age frescoes and archaeological finds, as appropriate for the timeframe of the Trojan War. The white helmets worn by Agamemnon and Menelaus, for example, recall a well-known boar's tusk helmet that was excavated at Mycenae and is kept today in the National Archaeological Museum, Athens. Text and image work well in this booklet, offering a tale from the deep past that has left historical and archaeological traces for us today.

The coupling of mythological and historical events gives credence to the narrative. In the opening page, children read that the greatest heroes of ancient Greece took part in this war, and this has connotations for historicity and identity-building. Clearly, the story is about human and divine affairs, and differences and similarities between mortals and gods.

On the whole, mortals are rather weak. Paris appears to be fragile and Aphrodite guides him all the time in his trip to Sparta and abduction of Helen. Agamemnon is at a loss, and he needs his brother and other warrior kings to launch his campaign against the Trojans. There is an emphasis on the salience of teamwork and on large numbers of kings and ships, as these could counterbalance mortals' weaknesses. There is nothing about male decisiveness in the story. Instead, mortals are at the mercy of gods' desires. Agamemnon has to take Achilles with him because a seer said so.

Odysseus, being inventive, manages to reveal who Achilles is from amongst a group of females in Lykomedes' palace on the island of Skyros. There are gender issues here, reflecting diachronic stereotypes in male and female behaviour and appearance, and children may identify with these stereotypes. Achilles is interested in weapons, and not in fine cloth for garments that merchant Odysseus offers him. The illustrator shows Achilles blond, and with good reason as this is how Homer describes Achilles, but also with a broad square

face with prominent cheekbones, suggestive of Achilles hyper-masculine character, as befitting a brave warrior.

Aphrodite's beauty is probably indicated by her long blond hair, which is tied up with a blue ribbon matching the colour of her long dress. Helen, by contrast, has black hair and more elaborate and colourful clothes on, recalling a Bronze-Age lady. The illustrator offers a balanced view of what female beauty entailed.
