Additional information

Based on: Katarzyna Marciniak, Elżbieta Olechowska, Joanna Kłos, Summary Michał Kucharski (eds.), Polish Literature for Children & Young Adults Inspired by Classical Antiquity: A Catalogue, Faculty of "Artes Liberales", Warsaw: University of Warsaw, 2013, 444 pp. This book contains a large number of ancient Greek myths adapted for a young audience. The author treats the following myths: the birth of gods; Demeter and Persephone, Prometheus and Pandora's box, Atlas' punishment, love between Eros and Psyche (missing in the 1st edition), Odysseus, Achilles, Perseus (missing in the 1st ed.), Sisyphus, Pegasus, Daedalus and Icarus, Orpheus, Daphne and Apollo, Niobe (missing in the1st ed.), Pygmalion, Narcissus, etc. Homeric myths are placed at the end of the volume. Some of the stories are shortened: occasionally, the author selects only one motif or episode from the life of an ancient character (e.g. the episode of the Sphinx is the only story about Oedipus). Srokowski's retelling of the most popular myths is followed by a brief reinterpretation of Greek mythology in Polish literature, world art, theatre, and music, written by another author, Adam Sznajderski. The later editions end with a list of the most important Greek gods, heroes, Titans, all the Muses and a list of popular maxims, proverbs and symbols connected to the culture of Ancient Greece. The book presents mythological plots, motifs, symbols and metaphors Analysis selected by the author to comply with the school curricula of that time (p. 4). That is the reason why some important plots are omitted or shortened. The author presents the myths in three ways. The first, most frequently used, is preserving versions not ad usum delphini in

shortened. The author presents the myths in three ways. The first, most frequently used, is preserving versions not *ad usum delphini* in case of drastic subplots and/or details generally known in Greek mythology, e.g., the accidental death of Bellerophon's brother, Daedalus killing his clever apprentice, Heracles' bloody revenge on Augeas' kin, the massacre of Trojan youths close to the river Scamander or the description of Achilles defiling Hector's corpse. In some cases, the author does the opposite – he spares the young readers instances of excessive cruelty. Thus, Ouranos has been stabbed by his son, but the details of the injuries and consequences of this act are omitted. Similarly, Orpheus' death is not emphasized; he just "passed away one day to the shadowland" (p. 74). Also, Oedipus comes from Corinth to avoid killing his father, save Thebes and become

	king – his fate before and after meeting the Sphinx is not revealed. The third way is through the author's interpretations, including modifications of the most popular versions: Prometheus places Hope at the bottom of Pandora's box, Daedalus advises Ariadne to give the thread to Theseus, and that is the reason why he gets punished and imprisoned with his son in the Labyrinth. Another example of an interpretation is the addition of a fairy who appears to Oedipus in a dream to help him solve the Sphinx' riddle. The fairy's assistance highlights the fact that a man on his own cannot deal with the riddle. Because Oedipus has the gods' support, they send him a fairy to liberate the people of Thebes and rid the city of the Sphinx. The last five chapters are connected with Homeric plots starting with the description of Achilles' shield and ending with Odysseus coming to Calypso.
	A chapter by Adam Sznajderski is included, about mythical themes in Polish literature, to facilitate the learning of Greek mythology against the background of its literary reception. Furthermore, it reinforces the value of the book aimed directly at school children, who learn about mythology as required by the curriculum of teaching the Polish language.
