Summary

Based on: Katarzyna Marciniak, Elżbieta Olechowska, Joanna Kłos, Michał Kucharski (eds.), [\*Polish Literature for Children & Young Adults Inspired by Classical Antiquity: A Catalogue\*](#), Faculty of "Artes Liberales", Warsaw: University of Warsaw, 2013, 444 pp.

In this dictionary, alphabetically ordered entries take school children on a journey through Greek and Roman mythology. Accessibly written descriptions, mainly of gods and heroes, present adaptations of the most important myths and ancient anecdotes. He opts for versions of myths generally accepted by scholars, except particularly long and complex stories. In such cases, he briefly introduces other existing versions, often referring to sources. This format provides children with a good first impression of mythology without overwhelming them with myriad interpretations. One hundred thirty black-and-white sketches by Barbara Opoka illustrate and liven up an otherwise standard glossary style, ensuring an easier and more enjoyable reading experience for children. These sketches allow children a glimpse of mythological events and familiarize them with ancient art: sculptures or bas-reliefs, as well as vase painting. The book is aimed specifically at younger school children but can also serve as a reference for adolescents.

Analysis

The publication is the first modern Polish lexicon of Greek and Roman mythology, though many valuable textbooks about mythology also exist. The main goal of the publication was to create a guide for young readers, facilitating the study of literature and art history, where the presence of mythological characters is evident. Though the dictionary has not been written for an academic purpose, the author's deep and thorough knowledge of Greek and Roman mythology makes it an appropriate resource for school readers and useful for other audiences.

The dictionary combines scientific information based on reliable sources with an accessible, clear composition and illustrations,

enriching the text with images of ancient art. Each entry provides information about the names of mythological characters (their Greek or Latin forms if different than in Polish, in some cases their etymology) and their genealogy. The cults and/or festivals of Greek gods and heroes and their Roman counterparts are also discussed. Equally valuable as the ancient "who is who" are the concluding segments of each entry listing ancient and modern literary, musical (operas) and other works of art related to mythological characters. This part can be considered very useful as it shows the continuous presence of particular characters or mythical tales in the European culture through the ages. The text is full of references to other related entries, which can satisfy readers' curiosity and extend their knowledge. There are no separate entries about Roman deities. The names appear only as equivalents to the Greek names (e.g., Hercules → Heracles, Luna → Selene). Some minor characters are included (e.g., Calais → Boreads, Castor → Dioscuri, Clotho → Moirai).

Although Greek mythology is replete with sex and violence, such incidents are often omitted or glossed over in consideration for younger audiences. Still, the author, relying on ancient sources, treats his young readers seriously and presents subplots negatively affecting the selected character's honour. The myth of Heracles provides a good example. While the author does not mention Linus' manslaughter or Thespius' daughters' story, as they are of minor relevance, he openly admits that Heracles murders his wife (Megara) and children in a bout of madness. This part of the myth is key in understanding why the hero served Eurystheus.
