Summary

King Midas and the Gold is a children's storybook written with deliberately simple language for those learning to read. It is part of a series that contains many examples of traditional myths and simplified versions of classical literature.

The Midas myth is told in an extremely simplified form as the paramount focus is telling a story with very basic vocabulary. There is more emphasis on Midas' kindness than his foolishness or greed. The text states 'he was kind', accompanying a picture of him scattering gold coins. His kindness to the elderly father of 'a god' leads to his golden touch. Midas wishes to give up his gift once his dinner has been turned to gold. The story ends with the gift being washed off. A series of seven related puzzles follow. The book closes with an *About the Story* section.

Analysis

King Midas and the Gold is a very sweet-natured retelling of the myth of Midas (for which see Ovid, *Metamorphoses*, 11.90-193). The characters all act from positive motives, and they are illustrated mostly smiling, in simple soft-toned colours. Midas' kindness to the old man and his swift reward convey a moral message encouraging altruism. The king's generosity to his people establishes the point that his kindness is a pattern of good behaviour, reinforcing the suggestion that his fault is thoughtlessness rather than anything more sinister. The unnamed god (unnamed because of the level of the target audience's reading), is also presented as benevolent. He greets his father warmly, shows concern for Midas' plight, and displays no hesitation in helping Midas once the king realises his mistake. The god is depicted as a young man with very blonde hair bound by leaves, carrying an elaborate staff. The god's power is reinforced through the illustrations. When his godhood is being revealed, he glows magically; he is shown turning grapes into wine with a magic staff, and there is no doubt that the god is responsible for Midas' new ability. This is an ancient Greece in which magical things can happen and gods are benevolent.

Many retellings of this myth have Midas turn his daughter to gold, following the nineteenth-century Nathaniel Hawthorne tradition. This is not introduced into the narrative, but there is a hint of it in the illustrations, in which a servant is transformed. The simplicity of the

text does not allow for elaboration on this subject, but its presence in the illustration enables further exploration. Other potential extensions of the ancient myth, such as the competition between Apollo and Pan and Midas' receipt of ass' ears have been avoided, perhaps partly for reasons of space as well as for their more potentially disturbing nature. Overall this retelling communicates the myth's traditional moral message about greed and adds encouragement to be kind. It supports learners in their progression as readers, while also familiarising them with a major myth and with the origin of a phrase still used in the modern world, namely 'golden touch'.

The book's illustrations place the story in antiquity. The characters wear gowns and sandals, and there are depictions of classical style architecture throughout. The puzzles are followed by an 'About the story' section. It states that 'King Midas was a real king. He lived in Ancient Greece around 3,000 years ago', while the river, the river Pactolus, is in modern day Turkey. It is quite likely that Midas was based on a historical figure, although tradition places him in Phrygia, north-west Turkey, rather than in Greece (see e.g. Herodotus, 1.14; 1.35; 8.138; Strabo, 1.3.21). While the error is somewhat unfortunate, the inclusion of this section suggests a desire to equip adults supporting the child reader with extra information and conveys the idea that the story's antiquity is part of its value and appeal.

Practitioner's Notes

The current reviewer has found this an enjoyable book to read with groups of four-year olds. It has been well received by the children whether the book is being read to them, or they are beginning to read for themselves with support. The repetition of simple words such as 'gold' 'god' and even 'Midas' helps growing readers to recognise letter patterns. The illustrations are full page and very engaging; children enjoy picking out details. As the book's primary emphasis is on readability, there is less explicit discussion of motives, moral issues, and other factors than can sometimes be found in retellings of the story. This makes adult supervision particularly useful as an extension of reading practice – the children can read to the adult, and the adult can ask leading questions in a second go through the book. Constructive questions include:

- *Why does Midas help the old man?*
- *Why doesn't Midas want the gift anymore? Can people eat gold food?*
- *What else could Midas have asked for? What would you ask for?*
- *Is Midas a good king?*

Many of the children thought that the god was a woman, confused by his tunic and long, blonde hair.
