General information	
Title of the work	The Book of Bees [Pszczoły]
Country of the First Edition	Poland
Country/countries of popularity	Worldwide
Original Language	Polish
First Edition Date	2015
First Edition Details	Piotr Socha, <i>Pszczoły</i> , text by Wojciech Grajkowski. Warszawa: Dwie Siostry, 2015, 72 pp.
ISBN	9788363696559
Awards	2015 – Polish Book Publishers’ Society (Polskie Towarzystwo Wydawców Książek) "The Most Beautiful Book of the Year" Competition (the best children’s and YA book); 2017 – Deutscher Jugendliteraturpreis; 2017 – Wissenschaftsbuch des Jahres 2017; 2017 – the ALCS (Authors’ Licensing & Collecting Society) and SoA (Society of Authors) "Educational Writing Award"; 2017 – IBBY Estonia "Tower of Babel".
Genre	Instructional and educational works, Picture books
Target Audience	Children (according to the publisher, aged 6+)
Author of the Entry	Krzysztof Rybak, University of Warsaw, rybak.km@gmail.com

<i>Peer-reviewer of the Entry</i>	Elżbieta Olechowska, University of Warsaw, elzbieta.olechowska@gmail.com Elizabeth Hale, University of New England, ehale@une.edu.au

Creators

Wojciech Grajkowski , b. 1980 (Author)

Wojciech Grajkowski (1980) graduated from the Faculty of Biology, University of Warsaw and Doctoral Programme at the Nencki Institute of Experimental Biology of the Polish Academy of Sciences (2011). Then he moved to the Educational Research Institute where he worked on the biological sciences at school (i.a. theory and practice of testing pupils' competence and analysis of educational reform of 2009). At the same time he conducted laboratory courses for school students and workshops for teachers. He is the co-author of nature and biology textbooks, currently, he designs board games and writes children's books. He authored the texts for *Pszczoły* and *Drzewa* illustrated by Piotr Socha.

Bio prepared by Krzysztof Rybak, University of Warsaw,
rybak.km@gmail.com

Piotr Socha , b. 1966 (Illustrator)

Piotr Socha (1966) studied at the Academy of Fine Arts, Warsaw. Since 1990's he is best known as a press illustrator working for many Polish and foreign newspapers and magazines, including *Machina*, *Polityka*, *Gazeta Wyborcza*, *Newsweek*, *Harvard Business Review*, and Polish edition of *Playboy* magazine. He also illustrates children's books and board games, but starting in 2015, *Pszczoły* became a book that generated not only positive reviews and awards in Poland, including the best children's and YA book in the Polish Book Publishers' Society (PTWK) at "The Most Beautiful Book of the Year" Competition in 2015, but also international recognition (i.a. many foreign editions and awards, including the Deutscher Jugendliteraturpreis in 2017 or the Wissenschaftsbuch des Jahres 2017). In 2018 he illustrated another

big-format book *Drzewa* [Trees]. More about Socha on his [official page](#) (accessed: March 4, 2019).

Summary

Pszczoły is a large format non-fiction illustrated book. Each spread is dedicated to different topic concerning bees: their biology, production of honey, human-bees relations during history, modern beekeeping etc. Among general topics, the reader may find some connected to antiquity, presenting ancient Egypt, Greek mythology, and ancient history (Alexander the Great and Poppaea Sabina, the second wife of the emperor Nero). Also there are two newspaper-like spreads, containing briefly described facts about bees and beekeeping: on one of them the Aristotle is mentioned, on the other – Virgil's *Georgics*. Besides, ancient historians and writers such as Strabo and Pliny the Elder are mentioned, showing the antiquity of bee-keeping and the importance of honey in the ancient world.

Analysis

On the first spread dedicated to ancient Egypt (Tablica XII*), Socha mentions Strabo, a Greek geographer and historian from the 1st century BC and 1st century AD, who during his stay in Egypt witnessed the feeding of a sacred crocodile with cake and honey (cf. Strab. XVII.1.38). The text also mentions that Nefertiti and Cleopatra used honey as beauty cosmetic.

In the spread (Tablica XIII) presenting Olympian gods, one can see Hera, Poseidon, Hephaestus, Zeus, Athena, Apollo, Hermes, and Artemis. All – besides Athena – are very happy as mighty gods, they hold horns filled with nectar in one hand, and their attributes in the other hand. Also their clothes are attached with round golden pins with their initial (only Poseidon has the letter "N", probably because Socha first thought about his Roman version, Neptune, and later did not change the letter to "P").

As one may read in *Pszczoły*, the ancient Greeks thought that honey was a food worthy of the gods themselves. They consumed nectar and ambrosia – although we do not know the exact ingredients, we may assume, that honey was one of them, because Zeus grew up eating milk from the goat Amalthea (Gr. Ἀμάλθεια, in the Polish text misspelled "Almatea") and honey from the nymph Melissa (Μέλισσα), which literary means "bee" in Greek. It is mentioned that humans got to taste honey thanks to Apollo's son, Aristaeus (Ἀρισταῖος), who taught people beekeeping, cheesemaking, and how to tame the wild oleaster so it would produce olives.

Two following spreads present historical characters: Alexander the Great and Poppaea Sabina, the second wife of the emperor Nero. Alexander, after his death in Babylon was transported to his native Macedonia in a coffin filled with honey to preserve his body (cf. E. A. Wallis Budge, K.T., *The Mummy: A Handbook of Egyptian Funerary Archeology*, London: Cambridge University Press 1925, p. 208). Nero's wife Poppaea on the other hand used honey to remain beautiful. She took baths in asses' milk and applied honey to her skin. According to Pliny the Elder, the milk came from whole troop of she-asses, which accompanied Poppaea during her journeys (cf. Plin. Nat. 28.50).

There are also two classical references in the book, presented among other short notifications in the newspaper-like spreads. The first informs that Aristotle thought that the queen bee was a male (called by him "a ruler"), but was not clear in the case of workers: on one hand they do housekeeping (females), but on the other they carry a weapon (sting), so they may be males (cf. Arist. *Hist. An.* V.21–22, IX). The second says that the Roman poet Virgil dedicated to bees one of the books of his *Georgics*. He compared them to the cyclopes as a sign of respect for their hard work (cf. Verg. *G.* IV).

It is also worth noting that the individual artistic style of Socha is very comic and colourful. Characteristic round and slim characters, both human and animal ones are exaggerated and full of humour. Also Socha originally presents non-fiction content using not only science book elements such as plates, diagrams, graphs etc., but also a newspaper-like sheets and other attractive and amusing motives to introduce the history of bees in a friendly way.

*Eng. Plate XII. Instead of standard pagination Socha numbered each

spread with word "Plate" and Roman numerals as in old anatomy or botanical atlas. Unfortunately this element was changed in some foreign editions, including *The Book of Bees* which has standard pagination instead.
